Mr. Weisberg –

Sept. 27, 1995

Do yourself a favor, by reading The Aging Clock, by William Falloon, pub the Life Extension Foundation. Give attention to #Melatonin, for instance.

I write to ask you about the announcement about the new, forthcoming book that you mentioned. Is this another strange David Lifton act – announcing and then not producing? Suppression?

Allow me to recommend The Ordeal of Otto Otepka, William J. Gill, Arlington House © 1969. Sen. Dodd (amongst many other things) is of interest – the manner in which the Otepka hearings were finally "going somewhere" and then, after LBJ adverse influences, going nowhere (like the JFK investigation [and ~~Garrison~~ Fensterwald's noting ~~similar~~ familiar names reappearing in Watergate]. (Criminals frequently do the same thing twice and more, if it works the first time.)

Is your congressional contact Sen Dodd? (How is he different from his father?)

Be sure to read Bradley Ayres The War That Never Was c 1976 Bobbs-Merrill.
